

Features

- High accuracy voltage detection circuit
 - Overcharge detection : $\pm 25\text{mV}$
 - Over-discharge detection : $\pm 50\text{mV}$
 - Discharge overcurrent-1 detection : $\pm 10\%$
 - Discharge overcurrent-2 detection : $\pm 10\%$
 - Load short-circuiting detection : $\pm 10\%$
 - Charge overcurrent detection : $\pm 8\text{mV}/\pm 10\text{mV}$
 - Temperature detection : $\pm 3^\circ\text{C}/\pm 4^\circ\text{C}$
- Low power consumption
 - Supply current: $6.6\mu\text{A}$ max. ($T_a=+25^\circ\text{C}$)
- Delay times of overcharge, load short-circuiting, charge overcurrent and over/under-temperature are generated by an internal circuit (fixed).
- Delay times of over-discharge, discharge overcurrent-1 and -2 are controlled by external capacitors.
- 0V battery charge available or unavailable function
- Built-in breaking wire detector function
- Package: 48 pin LQFP、64 pin LQFP、80 pin LQFP
- Lead-free, Sn 100%, Halogen-free

Description

The NT1672/NT1673/NT1674 series are the 4~20-cell protection IC with temperature protection for lithium-ion /lithium-polymer /lithium-iron phosphate rechargeable battery pack. The high accuracy voltage, current detector and delay time circuits are built in NT1672/NT1673/NT1674 series with state-of-the-art design and process.

The NT1672/NT1673/NT1674 series have three types of discharge overcurrent protection and one type of charge overcurrent protection.

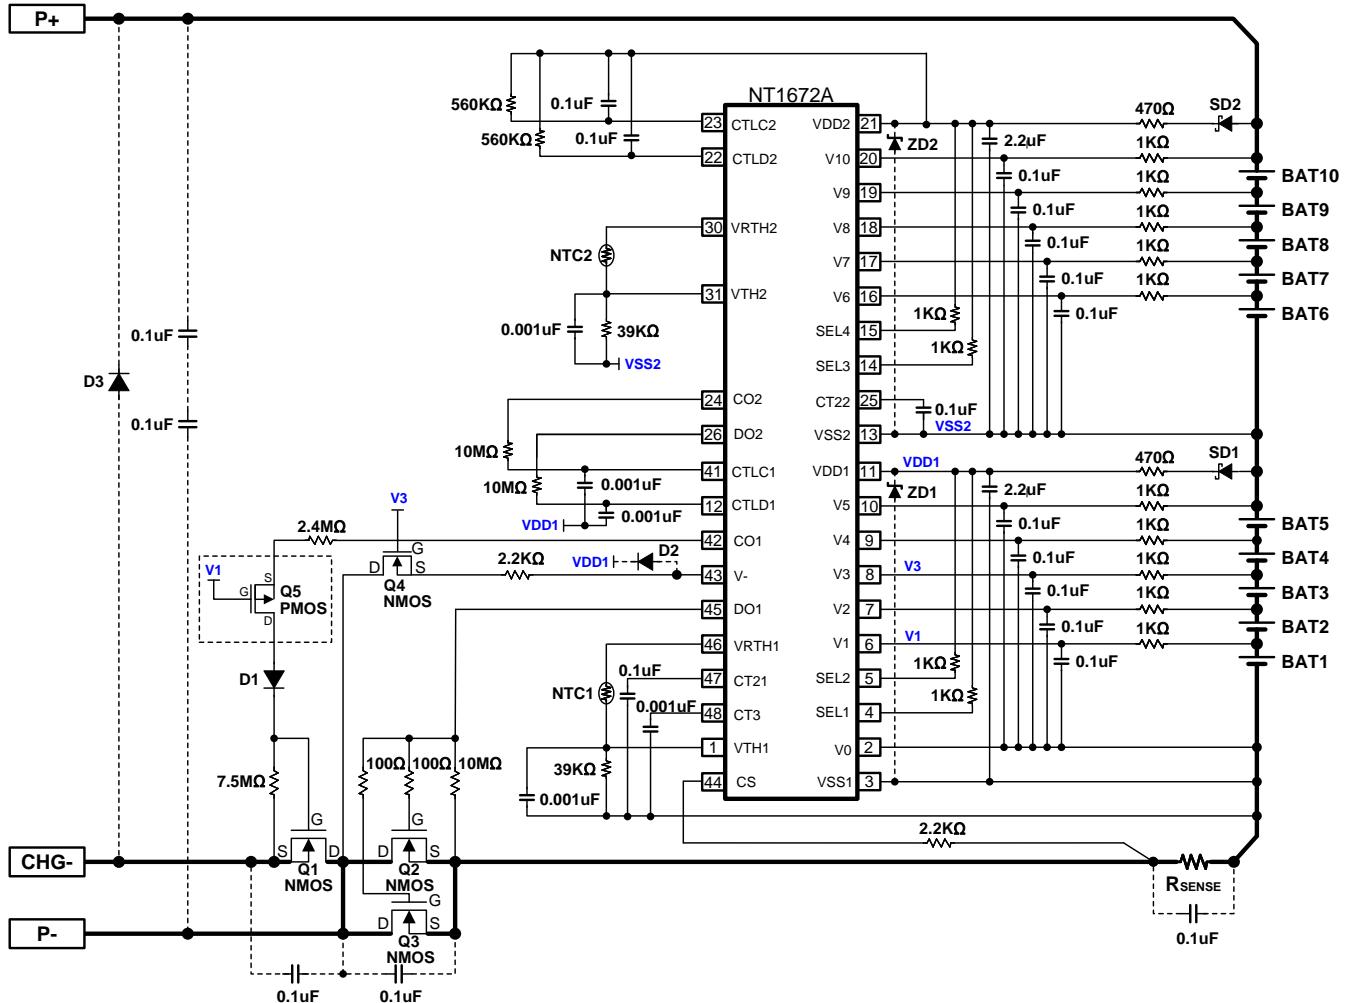

The NT1672/NT1673/NT1674 series have three types of over- temperature during charging, over-temperature during discharging and under-temperature during charging protection.

Applications

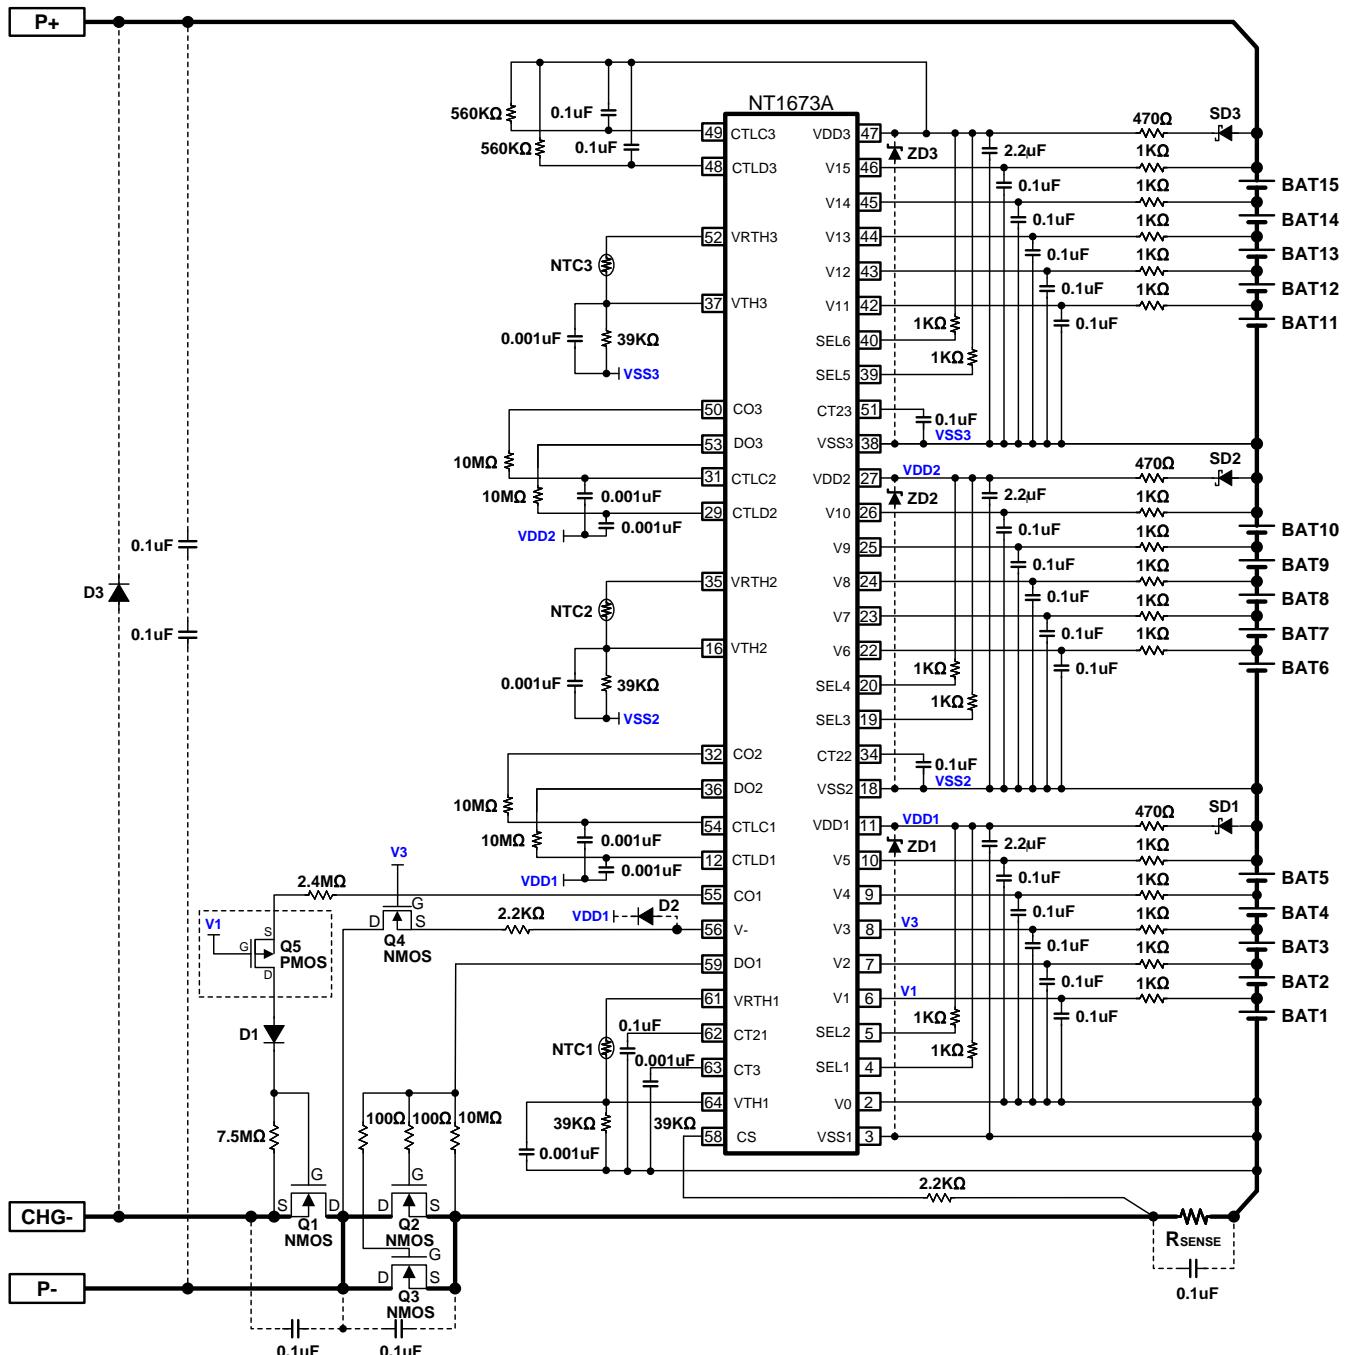

- Lithium-ion rechargeable battery pack
- Lithium-polymer rechargeable battery pack
- Lithium-iron phosphate rechargeable battery pack

Typical Application Circuit

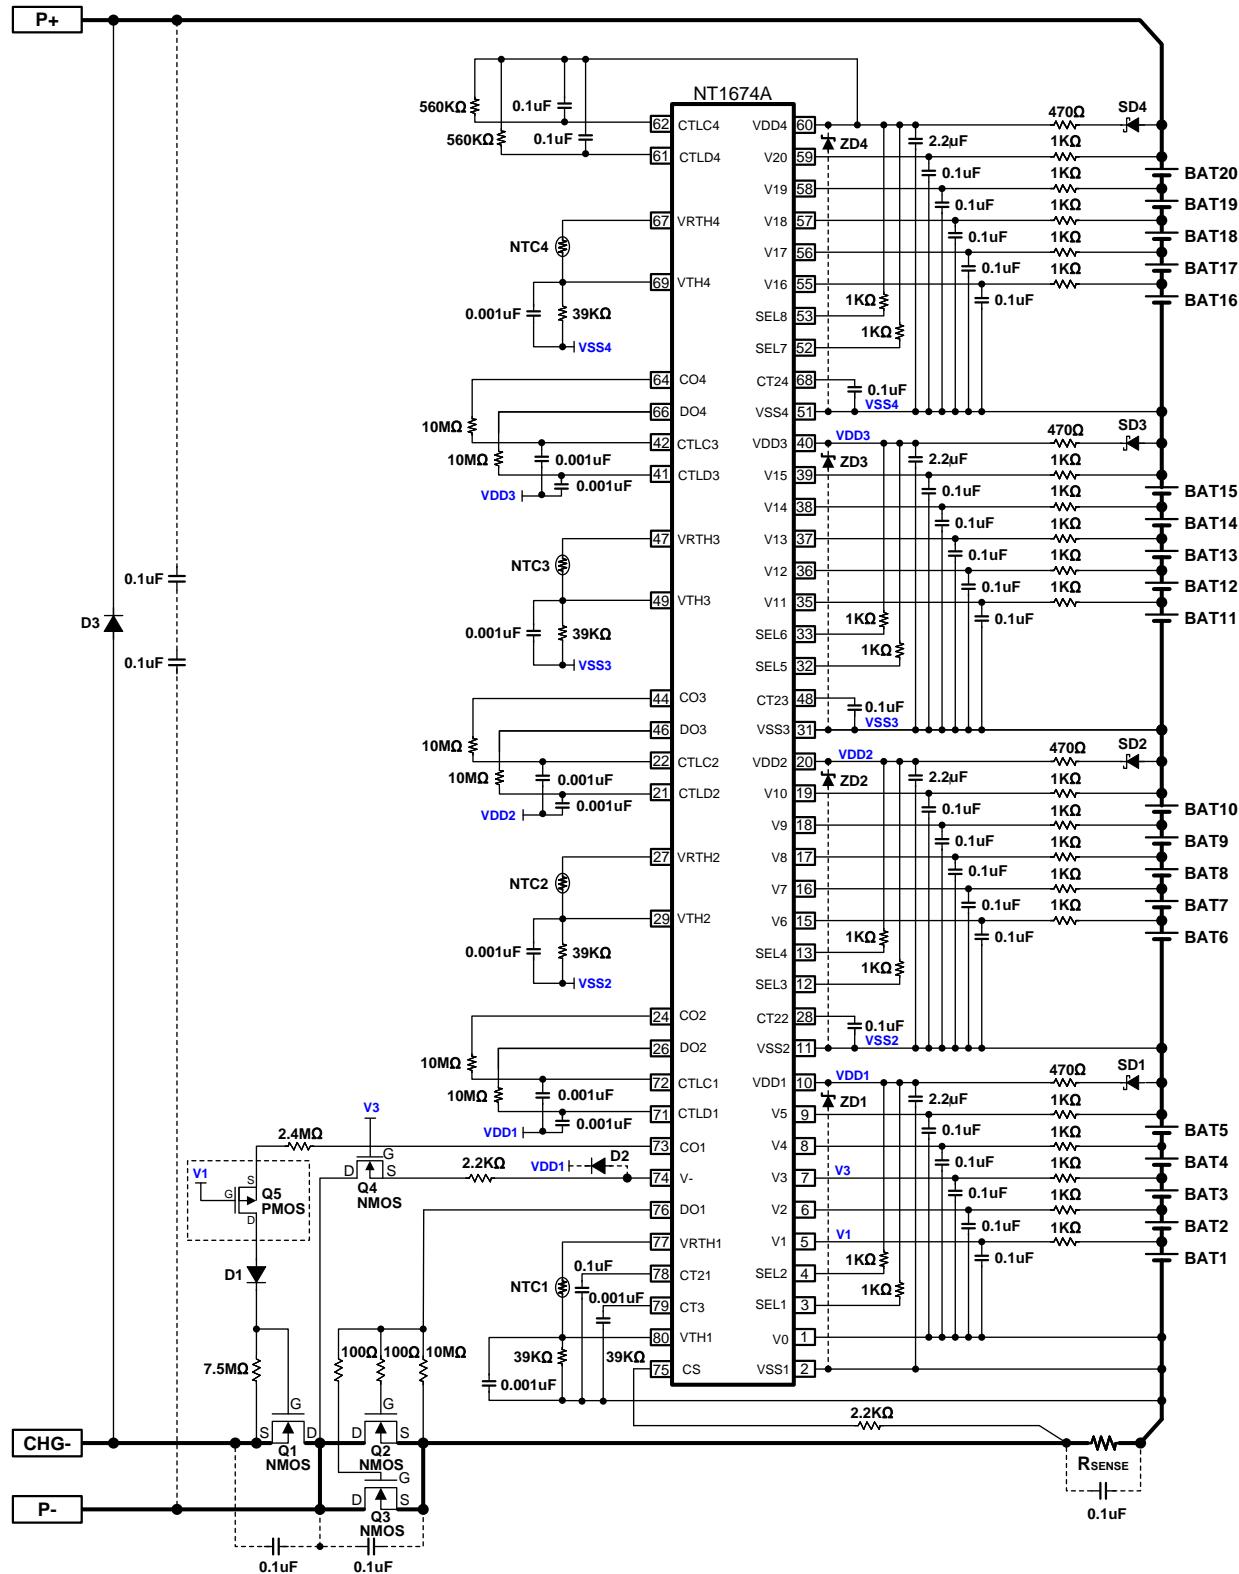

■ NT1672A

These devices have limited build-in ESD protection. The leads must be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

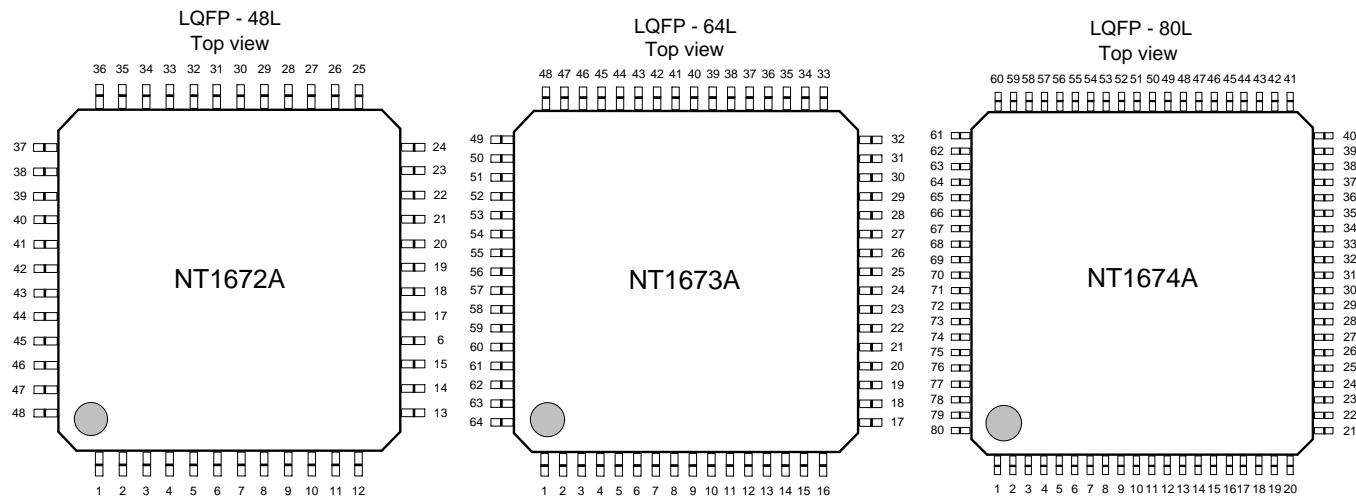

■ NT1673A

These devices have limited build-in ESD protection. The leads must be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

■ NT1674A

These devices have limited build-in ESD protection. The leads must be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

Package and Pin Configurations

| Pin No. | | | Symbol | Pin description |
|---------|---------|---------|--------|---|
| NT1672A | NT1673A | NT1674A | | |
| 11 | 11 | 10 | VDD1 | Power supply input pin -1 |
| 21 | 27 | 20 | VDD2 | Power supply input pin -2 |
| - | 47 | 40 | VDD3 | Power supply input pin -3 |
| - | - | 60 | VDD4 | Power supply input pin -4 |
| 3 | 3 | 2 | VSS1 | Reference voltage -1 |
| 13 | 18 | 11 | VSS2 | Reference voltage -2 |
| - | 38 | 31 | VSS3 | Reference voltage -3 |
| - | - | 51 | VSS4 | Reference voltage -4 |
| 2 | 2 | 1 | V0 | The input terminal of the negative voltage of cell BAT1. |
| 6 | 6 | 5 | V1 | Cell BAT1 positive voltage and cell BAT2 negative voltage input pin. |
| 7 | 7 | 6 | V2 | Cell BAT2 positive voltage and cell BAT3 negative voltage input pin. |
| 8 | 8 | 7 | V3 | Cell BAT3 positive voltage and cell BAT4 negative voltage input pin. |
| 9 | 9 | 8 | V4 | Cell BAT4 positive voltage and cell BAT5 negative voltage input pin. |
| 10 | 10 | 9 | V5 | Cell BAT5 positive voltage and cell BAT6 negative voltage input pin. |
| 16 | 22 | 15 | V6 | Cell BAT6 positive voltage and cell BAT7 negative voltage input pin. |
| 17 | 23 | 16 | V7 | Cell BAT7 positive voltage and cell BAT8 negative voltage input pin. |
| 18 | 24 | 17 | V8 | Cell BAT8 positive voltage and cell BAT9 negative voltage input pin. |
| 19 | 25 | 18 | V9 | Cell BAT9 positive voltage and cell BAT10 negative voltage input pin. |

Remark: For resistance matching, please refer to the recommended value of the BOM table

- If you don't need to use temperature protection function, you can use 10KΩ instead of NTC.

Table 5 : $R_{VTHn(n=1~4)}$ resistor vs. temperature detection threshold
